12 dial self made watches

These watches were customized with what I called the 12 dial. It is military inspired, and it's called that way because it was the 12th custom dial I designed. I used it for different styles of watches, thus not only military looking.

specs

- Metal case and mineral glass
- Size of case (mm): 40 x 10
- No water resistance
- Module: Chinese quartz
- Battery type: 377

Notes

I had this PAM style case lying around, and some of these dials already printed, so I decided to try them out and assemble a new watch.

All parts come from different sources (I should say different drawers), and were not easy to put together - especially the hands,

which
needed
to be
adapted
a bit to fit
the
movement.

It keeps
good
time and
is nice
looking.
Maybe
the case
shines
too
much...
